online. Though there is a rigorous physical entrance exam, the rest of the procedure such as the declaration of entrance exam results, ranking secured by the students, etc. is made through the college website which is timely updated. In addition to this, the delivery of provisional marksheet for undergraduate and postgraduate students also happens through the college website. Other aspects of the information system include the online issuance of admit card, section card, notices, examination schedules, and the sharing of the academic calendar. The college has a Student Management Software that allots roll number for students and helps the nonteaching staff in many ways to deal with the formal paperwork requirements of the thousands of students enrolled in the college.

## 1.4 – Feedback System

1.4.1 – Whether structured feedback received from all the stakeholders.

Students	No
Teachers	No
Employers	No
Alumni	No
Parents	No

1.4.2 – How the feedback obtained is being analyzed and utilized for overall development of the institution?  
(maximum 500 words)

Feedback Obtained

There is a usual practice to taking feedback from the students during convocation. Feedback from the alumni and the parents used to be taken during the alumni meeting. As no convocation was held during 2017-18, no feedback available.

## CRITERION II – TEACHING- LEARNING AND EVALUATION

### 2.1 – Student Enrolment and Profile

2.1.1 – Demand Ratio during the year

Name of the Programme	Programme Specialization	Number of seats available	Number of Application received	Students Enrolled
MSc	Nill	120	263	121
MA	Nill	410	181	126

2.3.2 – Students mentoring system available in the institution? Give details. (maximum 500 words)

In the modern society, the students go through various kinds of academic and psycho-socio experiences for which mentoring on a day-to-day basis is necessary. Moreover, at the graduate level the students are not mature enough to take their decisions therefore timely mentoring is required and the teachers are expected to give sufficient time to listen to the specific needs of the students so that correct assessment of the problem can be done and proper and continuous mentoring is provided. The college hopes that the mentoring provided by the college may help in transforming a student to have a well-formed identity with greater self-confidence to face the future challenges. Keeping the above in mind, the college has framed a mentoring policy which is as follows: The mentoring has to be done in the following areas: Academic, Personal problems, and Psycho-Socio problems. Each student shall be issued a “Mentoring Card” by the college and when the student approaches the mentor for the purpose of mentoring, he/she must possess the “Mentoring Card” issued by the college. The mentor shall sign on the “Mentoring Card” every time the student approaches the mentor for the purpose of mentoring. Each mentor must receive the complaint of the student through a written application. Thereafter the action taken must be written on the back of the above mentioned application submitted by the student and a copy of each of such application must be properly filed for the purpose of record. Each faculty member shall be given some students for the purpose of mentoring. The academic, personal and other problems of a student may be dealt by the mentor himself/herself. However, if the student is facing some non-academic personal problem due to misconduct of some students of this college, inside or outside the college campus, then the mentor can direct the concerned student to the Chief Proctor of the college for necessary action and relief/remedy. If the mentor concludes that problem of the student has Psycho-Socio nature then the mentor should direct the concerned student to the college counsellor in the college counselling cell for necessary counselling and relief. In case of extreme harassment of the girl student, the chief proctor may refer the case to the President of College Women’s Cell for necessary action and remedy/relief. The original copy of the application submitted by the student may, if necessary, be referred to the Chief Proctor or College Counsellor or President of College Women’s Cell for necessary action and relief/remedy.

Number of students enrolled in the institution	Number of fulltime teachers	Mentor : Mentee Ratio
4792	88	1:54

**2.4 – Teacher Profile and Quality**

2.4.1 – Number of full time teachers appointed during the year

No. of sanctioned positions	No. of filled positions	Vacant positions	Positions filled during the current year	No. of faculty with Ph.D
93	92	1	2	66

2.4.2 – Honours and recognition received by teachers (received awards, recognition, fellowships at State, National, International level from Government, recognised bodies during the year )

Year of Award	Name of full time teachers receiving awards from state level, national level, international level	Designation	Name of the award, fellowship, received from Government or recognized bodies

<p>Our college being an autonomous constituent college of University of Allahabad funded by the University Grants Commission (UGC) under 2f and 12B, is governed by the financial rules such as UGC regulations, GFR 2017 and the University's extant statutes, guidelines, ordinances, regulations and rules with respect to the financing, procurement and utilization of the College's infrastructure. The college allocates sufficient funds in its annual budget to</p>

undertake various works of maintenance, repair, restoration and purchase of computers and electronic equipments for the digitization of the office. Funds are also allocated for the purchase of books, journals and magazines. The Maintenance Department, General Purchase/Procurement Committee, Library Committee, Staff Council, Timetable Committee, etc of the college manages the utilization of the available infrastructure optimally. One full time and one part time maintenance officers oversee the maintenance of buildings, classrooms and laboratories. Regular maintenance of physical infrastructural facilities such as air conditioning, Water coolers, etc Maintenance of digital infrastructure such as computers, printers, projectors and servers is done through the maintenance department by trained staff and external agencies. The college has two full time electricians, one plumber and one generator operator to ensure uninterrupted supply of electricity and water. The college also has computer hardware and software maintenance staff, vehicle stand keeper, gardeners and 24 hour security at the gate and inside the campus. To ensure cleanliness in the campus dustbins are kept at every place and authorized agencies from the Nagar Nigam removes the accumulated garbage. Solar light are placed to make energy saving campus. The college also receives feedback from students, teaching and non- teaching staff regarding the infrastructural facilities. The Principal may appoint a duly constituted committee or assign the work to the administrative office to ensure that maintenance work is completed. Procedure for utilization of facilities with respect to the academic infrastructure such as classrooms and laboratories, the timetable committee evaluates and optimizes the use based on the curriculum needs, time and area. Rooms of different sizes are allotted in accordance with the strength of the classes. The Timetable Committee also makes recommendations towards expanding the existing space, if required. Teachers also suggest more efficient use of the existing infrastructure, to balance the academics, co-curricular and extra-curricular activities. In case of infrastructural requirement for extra-curricular activities and sports, the Staff Council sets the broad guidelines on the usage of infrastructure, which are then ratified by the Administrative Office before implementation. The allocation of infrastructure to activities such as workshops and conferences is done through a two step process which considers the availability and the scale of the event. In case of support facilities, the need for infrastructure is first considered by a designated committee constituted by the Principal. The designated committee submits their recommendations for allocation of existing infrastructure for the support facility which is then implemented by the College.

### CRITERION VI – GOVERNANCE, LEADERSHIP AND MANAGEMENT

#### 6.1 – Institutional Vision and Leadership

6.1.1 – Mention two practices of decentralization and participative management during the last year (maximum 500 words)

Being an autonomous institution, the college understands the importance of decentralization. The college follows a federal structure where a lot of autonomy is provided to all departments in the way they induct fresh students each year for their postgraduate course through interviews, essay writing, etc. after, of course, they have successfully got through the entrance exam held each year by the college. For both the undergraduate and postgraduate programmes, the departments set internal exam papers, conduct guidelines, timetable for oral or written assignments. There is periodic change in the curriculum to make it up to date. Additionally, each department functions independently in their choice and design of programmes they conduct for their students as co-curricular activities such as debates, group discussions, essay writing, guest lectures, seminars, and so on. In the management of the institution, the college benefits from the participation of faculty members in innumerable ways. Faculty members head and constitute various committees and cells instituted by the principal such as the Anti-ragging cell, Examination Cell, Proctorial Board, IQAC, Women's Cell, Grievance Redressal Cell, Student Advisory board, etc. Staff members also play a vital role in the governing body and the finance committee of the college. Each department holds board of studies meeting at regular intervals the heads of departments and two senior members of the teaching staff constitute the academic council which takes important decisions in bolstering academic standards of the college. Like teaching staff, students too participate in many activities. In fact, each section of every class has an elected Class Representative (CR) who often acts as an important channel through which communication with the class takes place. There are many social/ cultural clubs and elections for student representation are held each year. The representative body so constituted post the elections meets the principal at regular intervals to share and address their grievances. Simultaneously, the student representatives conduct numerous cultural

activities more or less independently which keeps the college environment lively.

6.1.2 – Does the institution have a Management Information System (MIS)?

Partial

## 6.2 – Strategy Development and Deployment

6.2.1 – Quality improvement strategies adopted by the institution for each of the following (with in 100 words each):

Strategy Type	Details
Curriculum Development	The college provides freedom to the departments to revise and update existing curricula to incorporate latest knowledge development and introduce new courses in tune with government policies, employment and market need through committee of courses/Board of Studies.
Teaching and Learning	1. Student centric learning 2. through classroom teaching using ICT 3. Student seminar 4. Projects 5. Debates and Discussion • 6. Academic mentoring
Examination and Evaluation	Automation of Exam cell to ensure smooth conduct of examination declaration of result • There is a system of central evaluation of coded answer booklets • Internal assessment tests are conducted
Research and Development	Research programs are carried out by some of the teachers through major and minor research projects from different funding agencies like UGC DAE(BRNS) • University does not permit teachers to become guide for research students since the college is undergraduate
Library, ICT and Physical Infrastructure / Instrumentation	The college is fully ICT enabled. Central library is equipped with books, e-books and reference books. The library issues books to students as per their need, throughout the year. Wellequipped airy reading room with seating capacity of about 100 students. Library has separate section for e-library along with reprographic facilities.
Human Resource Management	At the end of Academic year Management reviews the existing positions and identifies personnel for various positions. From 2005 onward no appointments of teaching and non-teaching staff has been done on permanent basis. However the appointment of guest faculties is done.
Industry Interaction / Collaboration	Need based interaction and collaboration is done by Departments.

	Centers which are imparting vocational training have greater degree of interaction/collaborations with industries and other business houses.
Admission of Students	In general admissions in various degree courses are done through entrance examination, which is held every year in the month of June. • Some of the diploma and certificate level courses admit students through group discussion and interview.

#### 6.2.2 – Implementation of e-governance in areas of operations:

#### 7.1.7 – Initiatives taken by the institution to make the campus eco-friendly (at least five)

1. Students and the Staff in the college are encouraged to use bicycles as means of transportation, and college has marked a separate area where the cycles and vehicles of incoming students are parked. The entry to this stand is separate and students are barred from entering the campus on any motor vehicle. The idea is to keep the classroom atmosphere free from noise and air pollution.

The campus is a green zone devoid of any disturbance curated for quiet reflection and passionate give and take of ideas.

2. Tree plantation drives both within and beyond the campus are organized on a regular basis. Through these drives students learn to nurture nature. The campus is ultra-green all through the year and boasts of an eco-park as well as a botanical garden, besides parks of slightly more ordinary nature. The roads leading to departments are pedestrian friendly and students can be seen exchanging notes while taking a walk around the campus under the shadow of trees, big and small.

3. Plastic free campus: Our college promotes the idea that plastic, although seemingly all pervasive, can be rid of at least within the campus. Therefore, we do not allow the consumption of tobacco in any form and have made its possession a punishable offence. Also, we regularly reach out to our students to make this endeavour successful.

4. Paperless Office: We have a strong ICT infrastructure, and we aspire our day to day functions to be as paperless as possible. Many of our processes are completed through the online mode. Over the last few years we have significantly reduced reliance on paper.

5. Solid, Liquid, e-waste management: We have strategically placed dustbins in such a way that they are within reach of every student the students are encouraged to properly use them. Whatever e-waste is generated in the college is sold to an agency for further recycling.

#### 7.2 – Best Practices

##### 7.2.1 – Describe at least two institutional best practices

Two institutional best practices as per NAAC format. Title of the Practice: Compulsory Spoken English and Personality Development Course The Objective (100 words): Every year, many students who are admitted to our college for various courses come from rural/ semi-urban background where medium of instruction is often in the vernacular. Also, with deteriorating standards of teaching at the secondary level in public schools in rural areas, the students usually have poor communication skills particularly in English which is the language of the market as well as the medium of instruction in many of our courses, particularly those that are professionally inclined. Hence, it was felt that their communication skills be enhanced at the very beginning, so that they can be more at ease in the college academic environment and be better equipped to face market forces. The Context (150 words): The challenging issue in formulating this practice was reluctance on the part of the teachers on one

hand and stiff resistance from a section of students who opposed it as it entailed a slight increase in fee. To make the programme compulsory for all students was a big challenge in itself. Teachers were disinclined to embark on this journey because of their wholesale absorption in teaching regular courses, for which the time-table was too tight to leave any room for additional skill enhancement courses. Then, arranging classes for around 800 students annually

was a mighty challenge in itself. The Practice (400 words): It must be acknowledged that, in general, while a lot of emphasis is laid on teaching specific subjects across our academic programs, little to no stress is laid on development of communication skills of the students, particularly in the

English language which happens to be, fortunately or unfortunately, the language of market and employment in India and elsewhere. We also identified that there was an additional need of soft skills course for our students to enhance their employability, i.e., for them to be able to chart their growth stories/ trajectories specifically in the booming service sector. The

Compulsory Spoken English and Personality Development Course, in our estimation, meets the requirement of the service industry. We ensure that in the very first semester of their joining the students learn the nuances of the English language which includes the four skills of listening, reading, writing, and speaking. It aims at making students fluent in English, and enabling them through soft-skills, ready for corporate and other employment avenues. Evidence

of Success (200 words): This programme proved to be an instant success, as students thronged in large numbers to get registered for the course. It is not that the course was designed to teach them English, which they had already studied in their secondary classes. In fact, their knowledge was to be brought out in open by practice and by instilling confidence in them and by giving them an opportunity to overcome that sense of guilt in case they erred in public.

Once they started reciting in groups, holding hands and enacting plays, soon they developed confidence and started performing well in classes also. Their drop-out rate in the first year of their respective programmes was also reported to be reduced. As the programme was regularly monitored, student

feedback has been very encouraging in favour of this programme. Ewing Christian College can claim that we are the only college in Allahabad which has been able to address this big problem faced by deprived students by arranging successful organization of this skill development programme for its students without any external help and is sustaining it as an essential component of the college academic programme. Problems Encountered and Resources Required (150 words):

Some challenges that were faced by us in the introduction of this programme were as follows: Lack of qualified staff. Lack of infrastructure. Lack of funds. These problems were overcome in the following manner: • Lack of qualified staff: A well-known professional trainer of spoken English in the city was engaged by the college as the director of the programme. He enrolled 30 prospective candidates to be groomed as teachers and they were given

intensive training for a month, after which the best 8 were recruited as language teachers. • Lack of Infrastructure: An abandoned building of the college was renovated and prepared to house Center for Languages, where the programme could be run from 8 am to 5 pm. Additional development was a Language Lab with ten work-stations. Lack of Funds: Programme was made compulsory for all the newly admitted students, with a nominal fee of Rs. 600 initially.

Practice - II Title of the Practice: Compulsory Computer Awareness Programme Objectives of the Practice (100 words): The objective behind adopting this as a practice was to make our students coming from poor background and mostly on the wrong side of the digital divide - whether from Maths stream, or Biology stream

or Arts stream, including pupil teachers of B. Ed. Programme - overcome this digital divide by becoming computer literate, so that they may be equipped to learn through the digital medium while they are with us and also after they have graduated. The Context (150 words): To access digital data which has

become an important part of the knowledge ecosystem computer literacy has been

understood by us as a necessary academic achievement to make our students better prepared for the digital world. The Practice (400 words): Though the need and necessity of computer literacy has been identified, many institutions engaged in higher learning have been slow in their response, leaving the job for private operators, who charge exorbitant fee to maximise profits, which was often beyond reach of majority of our students. As such, the issue that was to be addressed was to enhance quality of educational programme through imparting computer literacy without losing sight of equity and access. Adopting this programme as a practice by making it compulsory at the degree level was the unique feature of this practice and it was being done for the first time by any college in the region. Evidence of Success (200 Words): Computer literacy classes opened up a new world for all the students to access and acquire information and knowledge. One of the first signs was the way they presented lectures arranged on various topics by different departments. Many departments acknowledged the palpable shift in the quality of their presentations.

Naturally, an avenue opened up for students to attain knowledge from alternative sources other than classroom teaching and books from the library. Another sign of success was the ease with which information was being shared by final year students searching for options after graduation. Ease in handling the computer and using internet for search, students are able to acquire information about various options and get registered in the entrance level exams in time and prepare adequately for them by downloading previous years' questions papers and other content related to preparation. This has resulted in a fairly good number of students securing admission in prestigious institutions like IITs, IIMs, DU, JNU, BHU and other institutions of higher learning of repute. Some of these graduates have informally shared that computers classes did place them in a better position as compared to their counterparts. Problems Encountered and Resources Required (150 words): To introduce the programme as a compulsory component of educational programme was a big challenge, because of the sheer number of students to be covered under this scheme. The target group was the senior students, and their number was around 600. Then, it was difficult again to economize on the fee front as this programme was capital intensive. Another problem was to design the programme in such a way that it is just sufficient to initiate the student in the use of the relevant technology in a limited time frame, and then leaving the students hungry to satisfy their curiosity on their own.

### 7.3 – Institutional Distinctiveness

7.3.1 – Provide the details of the performance of the institution in one area distinctive to its vision, priority and thrust in not more than 500 words

6. In 2004, when the first NAAC accreditation had already taken place in the college, and before the formation of the Lyngdoh Committee by the Supreme Court of India to curb and control criminalization of students politics on the campuses, the college administration and faculty sat down to figure out ways and means to improve the situation on the campus in such a manner that the student representative body may be formed in such a way that external influence may be curbed and student leaders may not become puppets in the hands of their external mentors but may work for the actual welfare of the students. A full concept paper was prepared and the form of the student representation was changed from the directly elected presidential form of student union to indirectly elected presidential form based on the electoral college formed on the pattern of parliamentary form of government. After framing the constitution of the Student Council and getting it approved by various bodies of the

college, in place of Student Union, Student Council was inaugurated in the college in 2005, which stamped out the external undesirable influence on the student politics altogether and gave opportunity to students to elect their representatives without fear or favour. Provision was made to elect representatives not only from classes demarcated as subjects, but also from all the student bodies like ten units of NSS, NCC, Tarun Shanti Sena, Student Christian Movement, etc. Also, toppers of various streams were nominated and representation to all religious communities and weaker sections was also provided for. The electoral college of about 116 students so formed was to elect their President and other office bearers numbering six. One of the positive outcomes of this process of election was that unlike in the previous case, when students used to take out processions all over the city, disturbing civil society in the process, they were constrained to now canvass inside their small classroom domains, restricting canvassing within the college. This brought about a sea change in the matters of discipline on the campus and diverted the energies of the students towards constructive activities. The impact of this innovation was profound on the campus and got reverberated in higher educational institutions all over Allahabad including the University. Ewing Christian College was the only college which was holding elections for the formation of Student Council since 2005. This student body has been active in bringing to the fore matters that are directly related with the improvement of academics and academic atmosphere on the campus. The college administration and the student body have been working together towards improvement of facilities for the students and to promote extra-curricular activities on the campus. An annual week-long cultural fest organized by the Student Council has become a regular feature of the college over the past many years ever since the Student Council was formed.
