2.3.2 – Students mentoring system available in the institution? Give details. (maximum 500 words)

In the modern society, the students go through various kinds of academic and psycho-socio experiences for which mentoring on a day-to-day basis is necessary. Moreover, at the graduate level the students are not mature enough to take their decisions therefore timely mentoring is required and the teachers are expected to give sufficient time to listen to the specific needs of the students so that correct assessment of the problem can be done and proper and continuous mentoring is provided. The college hopes that the mentoring provided by the college may help in transforming a student to have a well-formed identity with greater self-confidence to face the future challenges. Keeping the above in mind, the college has framed a mentoring policy which is as follows: The mentoring has to be done in the following areas: Academic, Personal problems, and Psycho-Socio problems. Each student shall be issued a "Mentoring Card" by the college and when the student approaches the mentor for the purpose of mentoring, he/she must possess the "Mentoring Card" issued by the college. The mentor shall sign on the "Mentoring Card" every time the student approaches the mentor for the purpose of mentoring. Each mentor must receive the complaint of the student through a written application. Thereafter the action taken must be written on the back of the above mentioned application submitted by the student and a copy of each of such application must be properly filed for the purpose of record. Each faculty member shall be given some students for the purpose of mentoring. The academic, personal and other problems of a student may be dealt by the mentor himself/herself. However, if the student is facing some non-academic personal problem due to misconduct of some students of this college, inside or outside the college campus, then the mentor can direct the concerned student to the Chief Proctor of the college for necessary action and relief/remedy. If the mentor concludes that problem of the student has Psycho-Socio nature then the mentor should direct the concerned student to the college counsellor in the college counselling cell for necessary counselling and relief. In case of extreme harassment of the girl student, the chief proctor may refer the case to the President of College Women's Cell for necessary action and remedy/relief. The original copy of the application submitted by the student may, if necessary, be referred to the Chief Proctor or College Counsellor or President of College Women's Cell for necessary action and relief/remedy.

College is already registered on N-LIST (National Library and Information Services Infrastructures for Scholarly content) Website which is an initiative of Ministry of Human Resource Development (MHRD) Under the National Mission on Education through ICT. On these workstations, Students can access upto 1,00,000 plus e-books and 3000 plus e-journals on the N-LIST. Students are accessing e-resources with facilities for Photostat and on line printer which are available on payment. A huge number of text and reference books (60000 old and 30000 new in circulation) are available through open shelf system, with a ratio of 30 books per student. Along with this, special collection of Encyclopedia Britannica, Encyclopedia of religion and ethics are also available in the library. Apart from the Main Library, nearly each department has got its own library, from where books are issued to the students by teachers. Over past 6 years, books worth around 8 Lakhs have been added to the library. The college library is open for students from 8:00 a.m. to 5:00 p.m. on all working days. A separate section for the teachers and researchers are also available in the library which is Wi-Fi enabled and has workstations as e-resources. A well constituted Library Advisory Committee under the supervision of a Library Secretary is functional. This Committee mainly works out the distribution of Library Grant on the basis of students enrolled in each subject. This committee also plans about the functioning of the library. Some recent initiatives taken by this Committee for rendering the Library user friendly are enumerated below

Previously, students used to fill-up issue card and once the book was issued, it was returned only next week. Students complained that they must get opportunity to peruse books before they get it issued as many a times, just by title, they are not able to ascertain about the content. Now, students are given entry in the stack room to select books before they get it issued. Number of magazines has been enhanced in the reading section of the library. There is open shelf system for the students where students can personally go into stack room pursuing the books and select which are to be issued to them. Ramp for Physically challenged students is also available. A dedicated library software has been designed to fully automate the library operations and the work of training the library staff on its use and data feeding is on. A dedicated content management system e-learning has been developed and is operational. Connected to wi-fi, it can be accessed all over the campus, including the library. Sports Sports Games are essential for the holistic development of personality. Further details are available on institution website under different links.

7.2 – Best Practices

7.2.1 – Describe at least two institutional best practices

Practice - I Title of the Practice "Development of Communication Skills"
--

Objectives of the Practice Most of the students coming to our college are coming from rural background where medium of instruction is Hindi. Again, with deteriorating standard of teaching at the secondary level, the students have a very poor communication skill and find it very difficult to accommodate in the academic programme of the college at the initial stage. As such, it was felt that their communication skills be enhanced in the very beginning, so that they get adjusted in the college academic environment and be better equipped to face the open competitive world in future. The Context The challenging issue in designing this practice was the apathy of the teachers on one hand and stiff resistance from a section of students, who keep on seeking causes for leading agitations and one of their easiest plank for opposition is to oppose any extra fee that is charged from the students. To make the programme compulsory for the students was a challenge in itself. Apathy of the teachers was because of their too much emphasis on teaching regular course contents only, for which the regular time-table seems to be tight enough to leave no room for skill enhancement courses. Then, arranging classes for around 800 students annually was a challenge in itself. The Practice In general, lots of emphasis is laid on teaching the specific subject throughout the academic program and no emphasis is laid on development of communication skill of the student. An individual takes recourse to many types of communication like verbal and non-verbal communication. In non-verbal communication there are various types of communication involved. Then now-a-days, apart from communication skills, soft skills are also important and personality development is another very important aspect. In USA, where 4 year degree programmes are in vogue, much emphasis is laid on development of communication skills and it is understood that good communication is essential to develop better human networks, without which, it is difficult to succeed in the present day society. Already, the importance of communication skills came to the fore with the development of service sector in the country and growth of software companies and call-centers. Many institutions sprang-up in the private sector, but the regular educational institutions were very slow in responding to this need of their students. Our College was the first college to take up the challenge of introducing the course as a compulsory add-on course. Evidence of Success This programme proved to be an instant success, as students thronged in large numbers to get registered in this course. It is not that the course was designed to teach them English, which they had already studied in their secondary classes. In fact, their knowledge was to be brought out in open by practice and by instilling confidence in them and by giving them an opportunity to overcome that sense of guilt in case they erred in public. Once they started reciting in groups, holding hands and enacting plays, soon they developed confidence and started performing well in classes also. Their drop-out rate in first year also reduced. As the programme was regularly monitored, student feedback has been very encouraging in favour of this programme. Nearly all the colleges of Allahabad tried to introduce this course in their units with limited success and could not gather strength to make it compulsory. Ewing Christian College is the only college of Allahabad which has been able to address this big problem faced by deprived students in general, by arranging successful organization of this skill development programme for its students without any external help and is sustaining it as an essential component of the college academic programme.

Problems Encountered and Resources Required Problems encountered in introduction of this programme were as follows: Lack of qualified staff Lack of infrastructure Lack of funds These problems were overcome in the following manner. • Lack of qualified staff: With an aim to run this programme on a professional basis, one person already established in the city as the best teacher of spoken English was engaged by the college as the director of the programme and was given free hand to develop the programme. He enrolled 30 prospective candidates to be groomed as teachers and they were given intensive training for a month, after which the best 8 were recruited as language

teachers. This initial effort proved to be very effective. • An abandoned building of the college previously used as staff residences was renovated and prepared to house Center for Languages, where the programme could be run from 8 am to 5 pm. The entire infrastructure was developed along with Language Lab with ten work-stations. • Programme was made compulsory, with a nominal fee of Rs. 600 initially, while the market was offering the same course for Rs. 2000. In fact, the real challenge was to make it compulsory at the college level, which could have invited stiff resistance from the student community, had it, and failed to deliver. Fortunately, the professional approach paid and the programme proved to be a success. Practice - II Title of the Practice "Making all the students computer aware compulsorily" Objectives of the Practice We are observing a very big change in the way information is being made available for sharing and dissemination. Thus to get digital information is an essential activities of the human life. The objective behind adopting this as a practice was to make our students coming from poor background and mostly on the wrong side of the digital divide - whether from Maths stream, or Biology stream or Arts stream, including pupil teachers of B. Ed. Programme - overcome this digital divide by becoming computer literate, so that they may be equipped to adopt the habit of becoming seekers of knowledge and become self- learners. The Context Presence of world wide resource of information and knowledge through World Wide Web(www) cannot be ignored. To access digital data, knowledge of computers is a must, and that is why computer literacy was identified as a necessary academic achievement to make our students better prepared for accommodating in the fast emerging and all-pervading digital world. To introduce the programme as a compulsory component of educational programme was a big challenge, because of the sheer big number to be covered under this scheme. The target group was Part III students, and their number was around 600. Then, it was difficult again to economize on fee front, as this programme was capital intensive. Another problem was to design the programme in such a way that it is just sufficient to initiate the student in the use of the relevant technology in a limited time frame, and then leaving the students hungry to satisfy their curiosity on their own. The Practice Though the need and necessity of computer literacy was soon identified, the regular institutions engaged in higher learning were very slow in their response, again leaving the job for private operators, who fleeced the students with an aim to earn profits and charged exorbitant fee, which was beyond reach of majority of students. As such, the issue that was to be addressed was to enhance quality of educational programme through imparting computer literacy without losing sight of equity and access. Adopting this programme as a practice by making it compulsory at degree level was the unique feature of this practice and it was being done for the first time by any college in the region. Evidence of Success Imparting of this skill of computer literacy opened up a new world for all the students to access and acquire information and knowledge. One of the first signs was the way they presented lectures arranged on various topics by different departments. At least one department was fair enough to acknowledge that the students were able to speak on some of the topics in much better way as compared to the teachers. Naturally, an avenue was opened up to acquire knowledge from alternative sources other than classroom teaching. Another sign of success was the ease with which information was being shared by final year students searching for options after graduation. Ease in handling the computer and using internet for search, students are able to acquire information about various options and get registered in the entrance level exams in time. This has resulted in a fairly good number of students securing admission in prestigious institutions like IITs, IIMs, DU, JNU, BHU and other institutions of higher learning of repute. Some of the pass-out graduates have shared that this imparted skill of computers placed them in a better position as compared to other students, as they could work in a better way on research projects and other assignments and were proud to be students of ECC, which was a well

identified and much respected name in the higher education echelons.

### 7.3 – Institutional Distinctiveness

7.3.1 – Provide the details of the performance of the institution in one area distinctive to its vision, priority and thrust in not more than 500 words

In 2004, when the first NAAC accreditation had already taken place in the college, and before the formation of the Lyngdoh Committee by the Supreme Court of India to curb and control criminalization of students politics on the campuses, the college administration and faculty sat down to find out ways and means to improve the situation on the campus in such a manner that the student representative body may be formed in such a way that the external influence may be curbed and the student leaders may not become puppets in the hands of their external mentors but may work for the welfare of the students. A full concept paper was prepared and the form of the student representation was changed from the directly elected presidential form of student union to indirectly elected presidential form based on the electoral college formed on the pattern of parliamentary form of government. After framing the constitution of the Student Council and getting it approved by various bodies of the college, in place of Student Union, Student Council was inaugurated in the college in 2005, which stamped out the external undesirable influence on the student politics altogether and gave opportunity to students to elect their representatives without fear or favor. Provision was made to elect representatives not only from classes demarcated as subjects, but also from all the student bodies like ten units of NSS, NCC, Tarun Shanti Sena, Student Christian Movement, etc. Also toppers of various streams were nominated and representation to all religious communities and weaker sections was also provided for. The electoral college of about 116 students so formed was to elect their President and other office bearers numbering six. One of the fall out of this process was election was that unlike in the previous case, when students used to take out processions all over the city, disturbing civil society in the process, they were constrained to now canvass inside their small classroom domains, restricting canvassing within the college. This brought about a sea change in the matters of discipline on the campus and diverted the energies of the students towards constructive activities. The impact of this innovation was profound on the campus and got reverberated in higher educational institutions all over Allahabad including the University. Ewing Christian College was the only college which was holding elections for the formation of Student Council since 2005. This student body has been active in bringing out to the notice of the college matters that are directly related with the improvement of academics and academic atmosphere on the campus. The college administration and the student body have been working together towards improvement of facilities to the students and to promote cultural and out of class academic activities on the campus. An annual week long cultural fest organized by the Student Council has become a regular feature of the college over the past many years, since the Student Council is being formed.
